

brand-new and ours alone!

NEW SOS TEL-AMATIC MIXER

SOS TEL-AMATIC
TWO POSITION
TRANSISTORIZED MIXER
MODEL MX-1

NEWEST MIXER A MIGHTY MIDGET!

Although a midget in size (2½" x 3" x 5") and weighing less than a pound (including cable and attached cannon connector), the new mixer will provide two low impedance mike inputs with volume controls.

Especially designed for use with Auricon Sound-on-film amplifiers, the SOS Transistorized Mixer can also be used to advantage with Magnasync and other high-quality recording equipment.

Easy to operate—even dialogue equalization may be cut in or out with a flick of the switch. Plug directly into the Auricon Amplifier and use three mikes. SOS TEL-AMATIC Mixer uses low-noise RCA transistors and a self contained 9 Volt Battery.
